Accident / Damage Indicator

CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada. Different information in a vehicle's history can indicate an accident or damage, such as: salvage auction, fire damage, police-reported accident, crash test vehicle, damage disclosure, collision repair facility and automotive recycler records. Not every accident or damage event is reported and not all reported are provided to CARFAX. Details about the accident or damage event when reported to CARFAX (e.g. severity, impact location, airbag deployment) are included on the Vehicle History Report. CARFAX recommends you obtain a vehicle inspection from your dealer or an independent mechanic.

- According to the National Safety Council, Injury Facts, 2007 edition, 7% of the 245 million registered vehicles in the U.S. were involved in an accident in 2005. Over 75% of these were considered minor or moderate.
- CARFAX depends on many sources for its accident / damage data. CARFAX can only report what is in our database on 14.Jul.2010 09:13:31. New data will result in a change to this report.

New York Police Reports:

- Do not include an assessment of damage severity
- Are required if the estimated damage exceeds \$1000
- Are released to CARFAX approximately 3 months after the accident date. At times, New York may have a backlog that will affect how quickly some accident records are displayed on the Vehicle History Report.

CARFAX History Impact

Accidents, service records, number of owners and many other history factors can impact a vehicle's value. The CARFAX History Impact is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX impacts the value of a particular vehicle. The vehicle's retail book value plus the CARFAX History Impact will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Inspections

Many states or counties require annual or biennial emissions and/or safety inspections. Odometer readings are collected at the time of the inspection.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Rebuilt/Reconstructed Title

A Rebuilt/Reconstructed vehicle is a salvage vehicle that has been repaired and restored to operation. These vehicles are often severely damaged before they are rebuilt and refurbished parts are typically used during reconstruction. In most states, an inspection of the vehicle is required before the vehicle is allowed to return to the road.

Salvage Title

A Salvage Title is issued on a vehicle damaged to the extent that the cost of repairing the vehicle exceeds ~ 75% of its pre-damage value. This damage threshold may vary by state. Some states treat Junk titles the same as Salvage but the majority use this title to indicate that a vehicle is not road worthy and cannot be titled again in that state. The following eleven states also use Salvage titles to identify stolen vehicles - AZ, FL, GA, IL, MD, MN, NJ, NM, NY, OK and OR.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

LEGEND

The National Highway Traffic Safety Administration (NHTSA) provides 3 different ratings - **full-width frontal crash test**, **side impact crash test**, and **rollover resistance**. The frontal crash test indicates how well the safety features and restraints will protect an occupant in a head-on collision. The side-impact test conveys the chance of a severe chest injury, while the rollover resistance rating estimates the risk of rolling over in a single vehicle crash. Go to [NHTSA](#) to learn more about these results.

Safety Recalls

NHTSA Safety Recalls:

Important: The following recalls were issued for the 2001 HONDA CIVIC EX by the National Highway Traffic and Safety Administration (NHTSA). To find out if a specific 2001 HONDA CIVIC EX still has open recalls that require repair, CARFAX recommends contacting an **authorized dealership** for more information.

Recall date:	06-06-2001
Units potentially affected:	120,649
NHTSA campaign number:	01V182000
Defective part or component:	FUEL:FUEL TANK ASSEMBLY:PIPE:FILLER:NECK
Description:	Vehicle Description: Sedans and coupes. The hose clamps on the filler neck tube have insufficient clamping force. In a collision, the tube could disconnect from the fuel tank, resulting in fuel leakage. Fuel leakage, in the presence of an ignition source, could result in a fire. Dealers will check the hose clamps for proper torque and tighten them correctly, if necessary. Owner notification began June 4, 2001. Owners who take their vehicles to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Honda at 1-800-999-1009.
Recall date:	12-13-2001
Units potentially affected:	16,459
NHTSA campaign number:	01V380000
Defective part or component:	INTERIOR SYSTEMS:ACTIVE RESTRAINTS:BELT BUCKLES
Description:	Vehicle Description: Certain sedans and coupes fail to comply with the requirements of Federal Motor Vehicle Safety Standard No. 209, "Seat Belt Assemblies." Certain rear seat belt buckles were improperly manufactured. The rear seat belts will work properly and provide protection in a crash, but the owner may experience difficulty unfastening the belt after the crash. Dealers will inspect the vehicles and replace the seat belt assemblies that were improperly manufactured. Only buckles that are marked (on the back side of the buckle) with an assembly number beginning with 00185, 00186, or 00187, will be replaced. Owners should contact their dealer for this replacement. Owner notification began January 22, 2002. Owners who take their vehicles to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Honda at 1-800-999-1009.
Recall date:	Not reported
Units potentially affected:	440,000
NHTSA campaign number:	04V086000
Defective part or component:	EXTERIOR LIGHTING:HEADLIGHTS
Description:	On certain passenger vehicles, the low-beam terminal on the head light wire harness can overheat and could cause the low beams to fail without warning. An unexpected loss of low beams could result in a crash. Dealers will inspect the head light switch and coupler for signs of heat damage. If heat damage is present, the dealer will replace the switch and coupler. If no heat damage is present, the dealer will replace the head light switch and one mating pin in the coupler. Owner notification is expected to begin during March 2004. Owners should contact Honda at 1-800-999-1009.
Recall date:	Not reported
Units potentially affected:	6,545
NHTSA campaign number:	07V512000
Defective part or component:	FUEL SYSTEM, OTHER:STORAGE:TANK ASSEMBLY
Description:	On certain compressed natural gas (cng) vehicles, in the event of a severe interior fire in the area of the rear seat, the cng tank may be heated unevenly, preventing the pressure relief device from venting the contents of the tank as designed. This could result in a tank rupture, explosion, and ejection of the tank from the vehicle. Dealers will install a heat insulator material to the rear seat back. An interim owner letter was mailed to owners beginning November 26, 2007. When parts are available, owners will be renotified asking them to bring in their vehicle for repair. Owners may contact Honda at 1-800-999-1009.
Recall date:	Not reported
Units potentially affected:	3,940
NHTSA campaign number:	08V593000
Defective part or component:	AIR BAGS:FRONTAL:DRIVER SIDE INFLATOR MODULE
Description:	Honda is recalling 3,940 MY2001 accord and civic vehicles. The driver's air bag inflator could produce excessive internal pressure. If an affected air bag deploys, the increased internal pressure may cause the inflator to rupture. Metal fragments could pass through the air bag cushion material possibly causing injury to vehicle

occupants. Dealers will replace the air bag inflator free of charge. The recall is expected to begin on or before December 22, 2008. Owners may contact Honda at 1-800-999-1009.

This 2001 HONDA CIVIC EX safety recall information was provided by the Insurance Institute for Highway Safety, Highway Data Loss Institute and is derived from the [National Highway Traffic and Safety Administration](#) list of safety recalls. Please call the National Highway Traffic and Safety Administration Auto Safety Hotline at 1-888-DASH-2-DOT (1-888-327-4236) to report safety defects or to obtain information on cars, trucks, child seats, and highway or traffic safety. Identifix Reliability Ratings

Category:	Comments:	Rating:	LEGEND
Engine	An occasional problem on this vehicle is the failure of the Evaporative (EVAP) Canister Vent Solenoid that is part of the Emission Controls. This problem can cause the Check Engine Light to illuminate. The cost to replace the EVAP Canister Vent Solenoid is estimated at \$49.33 and \$32.50 for labor. All prices are estimates based on \$65.00 per flat rate hour and do not include diagnostic time or any applicable sales tax.	!	<div>✓ Minimal Problems</div> <div>! Moderate Problems</div> <div>✗ Significant Problems</div>
Transmission & Driveline	An occasional problem on this vehicle is failure of the second gear clutch in the Automatic Transmission. This will cause the Automatic Transmission to slip, and the Check Engine Light to illuminate. Also, if the Automatic Transmission is rebuilt or replaced, the Powertrain Control Module (PCM) software needs to be updated. The cost to replace the Automatic Transmission is estimated at \$1800.00 for a Remanufactured Unit and \$318.50 for labor. The cost to update the PCM is estimated at \$65.00 for labor. All prices are estimates based on \$65.00 per flat rate hour and do not include diagnostic time or any applicable sales tax.	✗	
Steering & Suspension	Infrequent problems reported, all with low repair costs	✓	
Brakes	Infrequent problems reported, all with low repair costs	✓	
Heating & Air Conditioning	Infrequent problems reported, all with low repair costs	✓	
Starting & Charging	Infrequent problems reported, all with low repair costs	✓	
Accessories	An occasional problem on this vehicle is the failure of the Driver's Door Switch. Failure of the Driver's Door Switch may cause the Key Reminder System and the Dome Light to operate incorrectly. The cost to replace the Driver's Door Switch is estimated at \$3.43 for parts and \$26.00 for labor. All prices are estimates based on \$65.00 per flat rate hour and do not include diagnostic time or any applicable sales tax.	!	

This 2001 HONDA CIVIC reliability information was provided by Identifix. Identifix is the nation's largest technical support service for the aftermarket auto repair industry. CARFAX does not review, validate or edit the information and statements provided by Identifix, which do not represent the opinion of CARFAX.

[Back to top](#)**New Car Test Drive Review**

Category:

Summary:

Review:**All-new design for popular compact car.**

By Bob Plunkett, NewCarTestDrive.com

Overview:

Honda's new 2001 Civic offers improvements in power and efficiency, cabin space, safety equipment, and noise and vibration. It also comes with more standard equipment than before. With engines earning high fuel economy figures, all models qualify for ULEV status. Its improvements and positive environmental position moves the Honda Civic ahead of the curve in the compact class.

Since the 1996 Civic debuted, Honda's small car has set the pace in the subcompact class due largely to its quality, efficiency, pleasant road manners and comfortable cabin. More than 300,000 Civics roll out of Honda's North American production plants each year, placing the Civic among the top five best-sellers.

Despite this success, stylists and engineers at Honda in Japan and Ohio have spent the past three years developing new versions of the Civic that arrive as 2001 models. Their goal is to improve quality by a factor of 10.

The idea driving these new designs is to maximize space for people and minimize the room required for mechanical systems, produce larger but more efficient engines, increase safety systems and comfort features, and enhance the manufacturing process by constructing fine cars with refined components and body panels that fit together precisely. As a result, the new Civics, conforming strictly to four-door sedan and two-door coupe styles, increases in engine displacement, fuel efficiency, safety, cabin space and passenger comforts. Although exterior dimensions decrease slightly, the passenger compartment expands in volume to forge a more spacious cabin stocked with comfortable seats plus new safety systems like dual-stage frontal airbags and optional side-impact airbags (\$250).
